

AI workshop for developers

We teach your developers to use AI tools professionally, so your team delivers more without cutting corners.

Your team can

- Deliver new features to customers sooner
- Catch bugs earlier and fix them faster
- Work with AI the same way across the team
- Spot security risks before they are exploited

DKK 45,000

for the whole team · excl. VAT

DKK 3,000 per developer with a full group

The team works hands-on on a practice project with exercises that fit your needs.

At your office

09-16, one day

Up to 15 developers, all levels

Works with

Two instructors

Taught by Andreas and Niels, engineers from DTU who build business-critical AI systems.

“We were exploring AI, but at different speeds. With shared ground rules, we avoid a messy codebase, making collaboration significantly easier.”

Troels Anker Jørgensen, Head of Development, PDC StaffPlan
